Professional Experience

🔵 **Associate Software Engineer**
Griffins Global Technologies.
Mar 2024 - Present

- Played a key role in implementing and crafting intuitive user experiences for A-Closer-Look, focusing on enhancing customer feedback processes.
- Leveraged design principles and user-centered approaches to develop user interfaces that improve usability and satisfaction.
- Successfully fixed bugs in preexisting systems at A-Closer-Look, contributing to smoother operations and enhanced efficiency. By addressing bugs, saved both time and resources in business processes, leading to increased productivity and cost- effectiveness.
- Built custom features aligned with A-Closer-Look's business needs, with a strong emphasis on data security and robustness.
- Collaborated with stakeholders to understand requirements and translate them into functional and scalable software solutions.
- Worked collaboratively with cross-functional teams.

Software Engineer (Intern)

THE Jitu

Dec 2023 - Mar 2024

- Collaborated with a cross-functional team of developers, designers, and stakeholders to develop a comprehensive Teaching Management System.
- Participated in team meetings, sprint planning sessions, and daily stand-ups to discuss project progress, prioritize tasks, and address any blockers.
- Utilized frontend technologies such as React and Prime React component library to craft responsive user interfaces, ensuring optimal user experience across devices.
- Engaged in backend development using ASP.NET7 to build server-side applications, implementing RESTful APIs and microservices architecture to facilitate seamless communication. Collaborated with team members to design and implement a real-time notification feature using SignalR, enabling trainers within the system to receive instant updates.
- Worked on the backend to integrate SignalR into the application architecture, ensuring scalability and reliability of the notification system.

Data Entry Specialist.

THE Jitu

Oct 2023 - Nov 2023

Responsibilities:

- Assisted in the implementation of data migration processes from Procore to Sage Intacct, ensuring accuracy and integrity throughout the transition.
- Collaborated with the HR department to streamline pre-boarding processes for new data entry employees, facilitating a smooth onboarding experience.
- Conducted comprehensive data quality checks and validations to ensure the accuracy and completeness of migrated data.
- Maintained detailed documentation and reports on the data migration process, including challenges faced and the strategies employed to overcome them.
- Worked closely with the IT department to resolve technical complexities and system integration issues during the data transfer phase.
- Participated in team meetings and discussions to provide insights and suggestions for enhancing the data migration process.

Software Development Trainer.

ConsoliData-LTD

Jan 2023 - Mar 2023 | Voluntary

Key Contributions and Achievements:
- Worked for ConsuliData in tutoring students who have registered for the web development course on their online platform.
- Evaluated students learning Web development through simple projects deployed on GitHub.
- Designed a curriculum to be taught in two weeks for students registered for Web development online courses on their platform.

Software Developer

Bubble Bursts

Oct 2022 - Dec 2022 | Voluntary

- Developing a stock management system: My primary task was to create a web-based inventory management system that would enable the company to keep track of its stock levels, sales, and orders.
- Collaborating with stakeholders: I was expected to work closely with different departments in the company to understand their needs and requirements for the stock management system. This required excellent communication skills and the ability to work collaboratively with different teams.
- Testing and debugging I was responsible for ensuring that the stock management system was free from bugs and errors. I had to conduct thorough testing and debugging to identify and fix any issues that arose during the development process.
- Implementation and maintenance: Once the stock management system was developed, I was responsible for deploying it and ensuring that it was running smoothly. I had to provide ongoing maintenance and support to ensure that the system remained functional and efficient.
- Keeping track of finances and accounting.
- Door to Door delivery services.
- Online marketing of our products.
